

Slick Finish P100

TECHNICAL DATA SHEET

Description

Slick Finish is a specially formulated finishing wax, swirl remover and light oxidation remover. Slick Finish is easy to use and leaves a long lasting high gloss finish. Slick Finish rapidly cleans and removes most fine scratches, light surface imperfections, oxidation and stubborn stains. Slick Finish leaves an extra long lasting deep rich waxed finish. This product works well either by hand or by machine use. Slick Finish is clear coat safe.

Advantage

Slick Finish is a very easy to use long lasting wax/polish that will restore the natural sheen to faded or oxidized vehicles. It is an excellent buffing polish that quickly removes surface imperfections. Special bonding agents have been added to improve durability and provide added protection to today's clear coat finishes.

Directions

Apply a quarter size drop of Slick Finish onto the panel being restored. Spread material before polishing. Apply heavy pressure at first, and then apply lighter pressure as the polish begins to dry. When working by hand, apply with a soft clean cloth. Rub material thoroughly into the finish. May be applied to the entire surface before wiping. You do not need to allow product to dry completely before wiping. Slick Finish will quickly remove swirls and help restore oxidized finishes.

Specifications

Physical form	Thick Liquid
Color	Light Pink
Scent	Cherry scent
Density	9 lbs. per gallon
pH Solution	8.6
pH 2% Solution	8.6
Biodegradable Surfactants	Present
