

EZ Shine P101

TECHNICAL DATA SHEET

Description

EZ Shine is a specially formulated finishing wax designed for ease of use and fast, effective results. It features a unique blend of silicone and carnauba wax that delivers a deep, rich shine—especially on black and dark-colored vehicles.

Advantage

EZ Shine is simple to use and delivers lasting results until your vehicle's next service. Ideal for detail shops, car washes, and dealerships, it works as a quick detailer that cleans and waxes in a single, efficient application. EZ Shine can also be used as a clay bar lubricant for a smooth, professional finish.

Directions

Spray EZ Shine directly onto the vehicle's finish and wipe off using a microfiber or similarly soft cloth. Do not apply to hot surfaces, as high temperatures may cause the wax to dry too quickly and result in streaking. If streaking occurs, move the vehicle to a cooler area and gently wipe away the excess product. EZ Shine can be applied to a freshly washed vehicle to protect the finish and achieve a hand-waxed appearance without the added effort. It may also be used on a lightly soiled surface to quickly clean, restore shine, and enhance the vehicle's overall appearance in one simple step.

Specifications

Physical form	Thin Liquid
Color	Purple
Scent	Grape
Density	9 lbs. per gallon
pH Solution	6.8
pH 2% Solution	6.8
Biodegradable Surfactants	Present

Shipping Weight in Pounds

16 ounce (pint)	12 pounds/case
32 ounce (quart)	24 pounds/case
1 gallon plastic jug	36 pounds/case
