

Wire Wheel Cleaner C80

TECHNICAL DATA SHEET

Description

Wire Wheel Cleaner is an acid based wheel cleaner for professional users. It will easily remove brake dust, rust, dirt, and grime from wheels. Formulated with potent acidic compounds, this cleaner works by breaking down deposits at a molecular level ensuring a deep and thorough clean. It's quick acting formula makes it a go-to choice for heavily soiled wheels, particularly those made from chrome or other durable, clear-coated materials.

Advantage

Wire Wheel Cleaner excels at breaking down the toughest contaminants including, heavy brake dust, rust, and embedded road grime. ALWAYS WORK FROM BOTTOM TO TOP. This formula contains Hydrofluoric and phosphoric acid.

Directions

Always wear safety glasses and gloves when handling this product. Spray wheel with water then dilute product 4:1 with water. Spray on the wheel and allow 15-20 seconds to dwell, then rinse with hose. Clean one wheel at a time and do not let the product dry on the surface. Not for use on polished aluminum or after market rims without clear coat.

Specifications

Physical form	Liquid
Color	Tan
Scent	None
Density	9 lbs. per gallon
pH Solution	3.2
pH 2% Solution	<1.5
Biodegradable Surfactants	Present

Shipping Weight in Pounds

55 gallon plastic drum	495 pounds
30 gallon plastic drum	270 pounds
5 gallon plastic pail	45 pounds
